

COLORADO STATE UNIVERSITY
PARTICLE ASTROPHYSICS

The Department of Physics at **Colorado State University** invites applications for a **tenure-track faculty position in experimental or theoretical particle astrophysics**. We are seeking candidates who can strengthen and expand our involvement in ultra-high-energy cosmic rays (currently the Auger Observatory) or who can initiate a research program in another area of particle astrophysics or non-accelerator particle physics such as: high-energy gamma rays; high-energy neutrinos; or dark matter searches. Our high-energy physics group is also presently active on BaBar, T2K, EXO, and KamLAND. The position is expected to be filled at the Assistant Professor level, but other levels may be considered. Candidates should have a Ph.D. or equivalent degree in physics or a related field, an outstanding research record, and be capable of excellence in teaching at the graduate and undergraduate levels. Postdoctoral experience is desirable. The successful applicant will be expected to develop a vigorous, internationally recognized research program and to secure external funding. Applicants should submit online a detailed curriculum vitae, a description of research plans, and a statement of teaching interests to <http://www.natsci.colostate.edu/searches/physics/>. Additionally, applicants should arrange to have three letters of recommendation submitted. Applications completed by **January 15, 2008** will be given full consideration, but the search will remain open until the position is filled. For general information about the Department please see <http://www.physics.colostate.edu>. Inquires to: Jacob.Roberts@colostate.edu
Women and minorities are strongly encouraged to apply. Colorado State University is an EO/AA employer.
