MINOR IN PHYSICS

Students in other fields may find that courses in Physics are valuable for their major, or may simply enjoy Physics but not enough to take all the courses required for a major.

Students earn a minor in Physics by meeting the following requirements. Only grades of C- or higher are acceptable.

1. Completing PH 141, PH 142, and PH 314
2. Completing 8 credits from the following list:
   PH 315, 341, 351, 353, 361, 425, 451, 452, 462

Any substitutions must be approved by the Key Advisor.

Note: The only courses on the list which do not have MATH 340 (Introduction to Ordinary Differential Equations) as a prerequisite are PH 315, 353, and 361.
